

"Air Blaster" Nozzles

- Streamlined Orifice
- Aluminum-Stainless Steel
- Adjustable Nozzle
- Different Sizes
- Mounting Hardware

The "AIR BLASTER" nozzle is an advanced converging taper design to provide a high velocity air jet at a considerable distance from the nozzle..

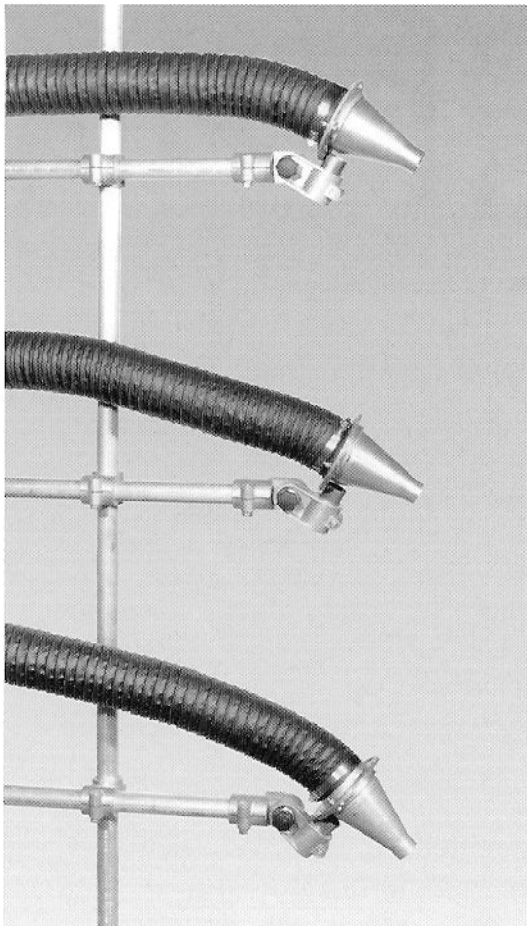

The efficient nozzle can throw air at high velocity to a distances of 8 feet from the nozzle.

The "AIR BLASTER" can be used to blow off other material besides water.

- SHOT BLAST
- STONES and SAND
- DUST (Using static eliminator)
- WOOD CHIPS
- METAL CHIPS

"AIR BLASTER" Nozzles

On overhead conveyor lines some parts come through the washer with puddles of water on the parts. The "AIR BLASTER" nozzle can blow the puddles of water off, so our standard air knives can complete the water blow off.

"AIR BLASTER" nozzles are effective over a wide range of air velocities. The nozzles are used from 3,000 FPM to 26,000 FPM.

OVERHEAD CONVEYOR "AIR BLASTER" can assist on difficult parts

"AIR BLASTER" Nozzle with Elbow

"AIR BLASTER" nozzles

Model	Inlet	Outlet
AB 2 $\frac{1}{2}$ -1	2 $\frac{1}{2}$ "	1"
AB 4-1 $\frac{1}{2}$	4"	1 $\frac{1}{2}$ "
AB 4-2	4"	2"
AB 6-2	6"	2"
AB 6-3	6"	3"

The "AIR BLASTER" nozzles are available in different outlet diameters and different inlet sizes (where flexible hose connects). Each application varies so our sales staff will assist in the selection of the outlet nozzle velocity and the nozzle.
